

AXIS2RP

“plug ‘n play” motion peripheral

MSRP \$4,997 standard (s)
\$5,997 upgrade (u)

Roll 20° (s) | 40° (u) Pitch 15° (s) | 25° (u)

Electric, mechanical motion simulation, professional pedigree

mount your existing sim rig right to the universal mounting surface

Playseat, Fanatec, Obutto, GT Omega, SPARCO, Ricmotech, 80/20, Custom

50" / 127cm wide

extensive motion integration software suite
40+ racing / 20+ flight

state of the art motion control algorithms

limited lifetime warranty

free cockpit mounting consult

one year of support

lifetime “CraftCon” software updates

96" / 243.8cm long

motion system details

40° / sec max velocity | 167° /s/s max accel

USB 3.0 | 200Hz control frequency

input power req: 100-240V (50/60Hz)

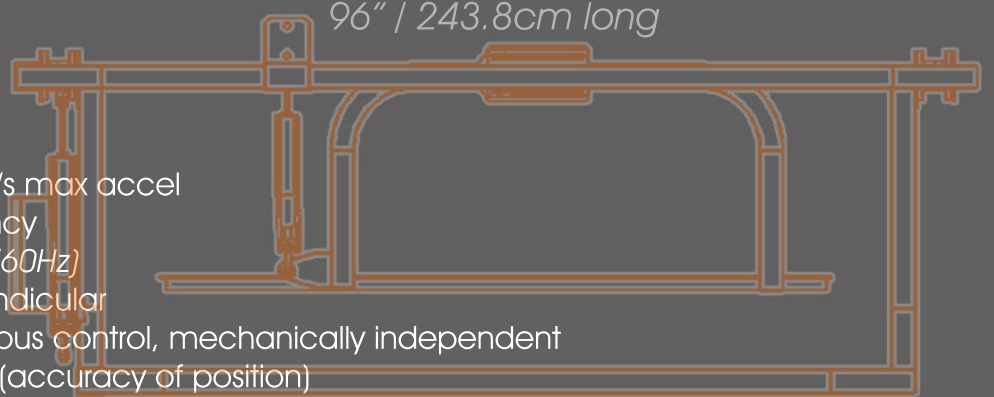

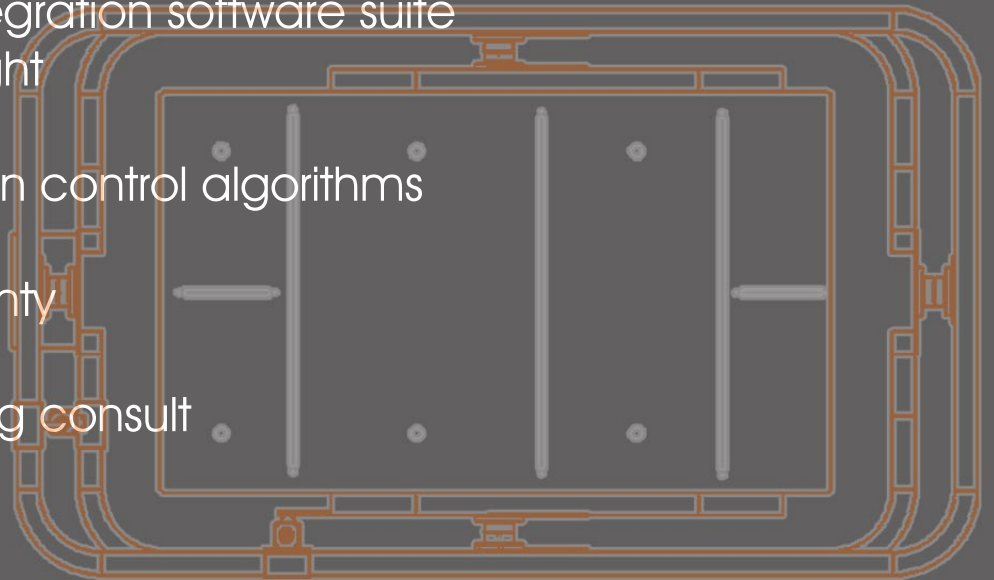

axis alignment: mutually perpendicular

axis synchronization: simultaneous control, mechanically independent

position resolution: 0.002 deg (accuracy of position)

repeatability: +/- 0.02 deg (same position will be within this range)

command interpretive interval: < 1ms (latency from data to motion)

APEX | AERO | AUTO | AXIS | ARKD
